## Range Camp

Range Camp is a field-based educational camp offered for students between the ages of 15 and 18. It is designed to offer an appreciation of the extent, importance and value of California's rangelands and natural resources. Students interact with university faculty and experienced professionals in classroom and field activities.

---

## Certified Rangeland Manager (CRM) Program

---

Cal-Pac assists the California Board of Forestry in its professional certification program to promote professional standards in all activities devoted to rangeland resources. A licensed CRM is required by state law to conduct covered professional range management tasks on forested landscapes in California, unless the work is performed personally by the owner of the land. Covered professional tasks include making management recommendations, developing conservation plans and management plans, monitoring, and other activities associated with professional rangeland management. Federal lands and rangelands void of tree cover do not require a license.

CRMs are required to be active members of the Society for Range Management.
